

The background features a light blue gradient with abstract circuit-like patterns. Purple and orange lines, some straight and some curved, are scattered across the page, often ending in small circles. A grid of small blue dots is visible in the bottom right corner.

Final Internship Report

Badi Federico

About me

My name is [Badi Federico](#), and I am a student in class 5BM at the “IIS Marconi Pieralisi” Institute in Jesi. I also participated in the **PCTO** program at the company [Loccioni](#).

Company Overview

Loccioni is a company based in Moie and Maiolati Spontini. The company focuses on developing advanced systems for measuring and testing in various sectors

Stage

During my internship at **Loccioni**, my main task was to develop a web application and create the code for the central injector testing station

Internship Evaluation

My internship experience was incredibly educational and professionally rewarding. I was able to become more familiar with:

- Different approaches to programming
- New and more effective problemsolving techniques
- What it truly means to collaborate within a large team
